Powershell/Bash

NoSQL (Mongo, Azure Cosmos)

Power Platform

ORM (Entity Framework, Dapper)

Messaging (RabbitMQ, Kafka, Azure Service Bus)

## EMPLOYMENT HISTORY

Jul 2022 — Sep 2023

**.Net developer, Paralect**

Tbilisi

Refactoring and supporting service for psychological help. Maintained and refactored project on .Net Framework, covered code in tests.

Migrated functional from monolith to microservice-based API.

**Stack:** .Net Framework, .Net Core, MongoDB, Kafka, MediatR, xUnit, Docker, Azure DevOps

Jan 2022 — Jul 2022

**.Net developer, MGA**

Минск

Created several microservices in a project set to fully migrate from legacy monolith. In a team, created auth service, inventory service. Defined and developed an invoice processing service, procedures of state recalculation and retroactive balance changes. Achieved 60% test coverage.

**Стек:** .Net core, EF, SQL, PostgreSQL, RabbitMQ, Docker, xUnit, CQRS, Event Sourcing

Apr 2020 — Dec 2021

**.Net developer, Viacode**

Minsk

Developed from scratch and internal Microsoft tool for processing incoming products feedback. Set up CI/CD pipelines in multiple environments, created a set of services for initial data processing from 30+ sources, created frontend on a low-code platform.

As a result, feedback processing time decreased from approximately a week to 1-2 days.

**Stack:** Power Platform, Azure Storage, Azure Cosmos DB, Azure Functions, Azure Service Bus, .Net Core

Dec 2017 — Mar 2020

**.Net developer, Viacode**

Minsk

Creation and supporting a set of products for SAN virtualization provider.

Created and supported extensions for on-prem cloud and SQL monitoring system.

**Stack:** .Net, Azure, AWS, MSSQL, SCOM, Python

## EDUCATION
